a ¼ mile from the school. They have been trying desperately to get a school for their beloved child. Unable to work in any meaningful way the just are able to pick up odd jobs for their bare survival as both parents are handicap. The mother is deaf and dumb; the father is deaf and has problems speaking fluently. They were looking for a miracle, hoping that a school will accept the child without paying. After several efforts a relative of theirs heard about the work Star of Hope have been involved in and brought them with the child to the school. She is now attending the school and is very happy. The parents have expressed their gratitude to Star of Hope in allowing their child to attend school freely and to have a sure hot meal everyday at school.
